科目名稱	公共政策專題（第二部分）
考試時間：180分鐘; 考試方式：open book	
<p>The ACF is a very popular model to explain how public policy is enacted in a pluralistic democracy. Yet Paul A. Sabatier and Christopher M. Weible were not quite satisfied with the explanation power of the 1998 model, which was devised by Sabatier and Jenkins-Smith. Therefore they revised the model in 2005 and proposed several important changes in the new model. Please compare the two models and explain what are changed and why, and apply the model to explain what has happened in Taiwan's society so that the controversial same-sex marriage law was passed on May 17 2019.</p>
